

Machine Learning and Learning CS in real-world

Expert Interaction

About ME

- SE- DataScientist - AOT Technologies
- Open Source contributor - Keras, DVC, SMC
- Kaggle 2x Expert (under Rank 500)
- FOSSASIA Open TechNights Winner
- GCI Mentor - Tensorflow

Introduction

Artificial Intelligence (AI)

Whenever a machine completes a set of tasks based on set of stipulated rules that solves a problem(algorithms), such an intelligence systems is AI

Machine Learning (ML)

Machine Learning is subset of AI application that learns by itself. It actually reprograms itself, as it digests more data, to perform the specific task it's designed to perform with increasingly greater accuracy

Deep Learning (DL)

It is a subset of machine learning application that teaches itself to perform a specific task with increasingly greater accuracy, without human intervention.

Data

Types of Machine Learning

Real World Applications

Supervised
Learning

Unsupervised
Learning

Reinforcement
Learning

Few interesting applications of AI

ImageNet
competition

AlphaGo
Zero

GPT-3

Protein
Folding

My tech Journey

Coding in Schools vs Real-world

- Learning Syntax
- Just building basic calaculators, software etc.

- Referring Documentation and googling a lot
- Building real useful software's

How to
learn next?
